

Please be sure that are ready for your trip and that you know before you go by reading and understanding the following information...

- That trip planning is the responsibility of the participant and Hoodoo Adventure Company Ltd cannot be held liable for the suitability of the trail for an individuals' fitness or skill level. Staff are happy to answer questions about the trails to the best of their knowledge.
- That the trails are not owned by Hoodoo Adventure Company Ltd and their condition is not the responsibility of the Company to maintain. The trail conditions can change quickly each season and it is not always possible for us to know the condition of the trail at each point. We will always do our best to ask riders how their experience was, but ability varies so greatly from one rider to the next, what is an amazing adventure for one person may be huge challenge for another.
- Bike choice is the responsibility of the rider. Our rental bikes were chosen specifically for use on the Kettle Valley Trail. If you have questions about the suitability of your bike for the trails you are going on.
- That any extraction from the trail will incur a minimum \$100 fee unless it is due to a mechanical failure of one of Hoodoo Adventure Company's rental bikes that cannot be fixed on the trail with the tools provided. Depending on location, time delays should be expected.
- That a flat tire (riding over glass, a nail, cactus, sharp rocks, pinch flat, etc) and mechanical failures can happen when riding a bike.
- If renting I will be provided with basic tools, a spare tube and pump and I will be prepared with the knowledge of how to change a flat tire if needed on the trail. See below links in the "Requirements" section for instructions on how to change a flat tire. If you do not know how to remove and change a flat tire these are 2 MUST WATCH videos .
- I can call Hoodoo Adventures for other mechanical assistance if needed on a rental bike and they will come and fix the issue or exchange bikes. There will be a charge for coming to change a tire.
- That I will not be refunded my bike rental fee for the reason of a flat tire or needing to adjust seat height on the trail.

Here are some helpful links to be sure you...

More about the trail...

Chute Lake to Penticton is a 40Km ride and the conditions can be variable depending on the time of year. The last 20km of the ride from Glenfir is the most maintained section of the trail.

Myra Canyon to Penticton is an 80km ride and conditions can be variable depending on the time of year. The trail is not well maintained between June Springs and Glenfir. The conditions tend to be the most challenging in Spring with large puddles and the fall with loose and sandy conditions. At all times the trail is highly affected by the weather. It is a 2% grade the entire trail, but this is a long ride and depending on your experience and the conditions, may be challenging. It is not recommended for inexperienced riders; ensure you train for the full 80kms!

To provide your feedback on the state of the KVR Trail to the Government responsible for the trail, please email a letter to the Minister of Forests, Lands and Natural Resources, Minister Doug Donaldson at FLNR.Minister@gov.bc.ca. The more voices heard, the more chance we have to revitalize and preserve this amazing asset for British Columbia.
